

Description and usage

Pallet Flow and Push Back Pallet Rack allows for the densest concentration of pallet storage, it is ideal for bulk storage, it can have up to double the capacity of Drive in / Drive Thru.

Pallet Flow Rack uses the "First In - First Out" method of recovery, thus is suited for items with a shorter shelf life.

Pallet Flow Rack uses Separate entrances and exits, requiring two aisle's for use, the forklift loads on one side and off-loads from the other side, thus rotating your stock.

Push Back Rack uses the "First In - Last Out" method of recovery, thus is suited for items with a longer shelf life.

Push Back Rack uses a "Common" entrance and exit, requiring the need of only one aisle, the forklift loads and recovers from the same location.

We can "MATCH IN" To your existing system! If you know what brand you have, Great!
If not then just match your existing rack with the Chart (Main menu) "Identification Chart".
